

### Inhalation and Aerosol cures with thermal water

The thermal inhalation therapies are traditionally used and scientifically recognized in the treatment of certain disorders of the respiratory tracts.

Inhalations and aerosols with thermal water are effective against:

- Chronic simple or obstructive bronchitis (excluding asthma and emphysema);
- Bronchitis
- Vasomotor rhinopathy and chronic pharyngolaryngitis;
- Chronic sinusitis or chronic rhinosinusitic syndrome;
- Chronic rhinosinusitic-bronchial syndromes;

Our thanks is addressed to the Consorzio Terme Euganee and to the Centro Studi Pietro d'Abano for the kind permission of some photos.
